

THE REMY

FDA & 510K-Cleared, Class IV Laser
That Simply Does More

Why The Remy?

Combining **power, portability, function** and **affordability**, The Remy checks all the boxes for a specialist looking to implement high-end laser therapy for his/her patients.

When you invest in a laser for your practice...

it should meet three important criteria:

One: It should be effective & result in desired patient outcomes.

Two: It should be affordable for the patient.

Three: It should result in ROI quickly for your practice.

What DPMs are Saying

I wanted to let you know that only after having my laser for just about six days now I have already been able to pay my monthly payments off for the next three months and I do not see this getting anything but better at this point.

I could not be more happy with the ease-of-use, the efficacy and the patient response to treatments. I highly recommend the Remy laser for anyone who is practicing in the sports medicine/podiatry world.

Peter J. Bregman, DPM, Bregman Foot-Ankle & Nerve Center

I have found the Remy to be an extremely valuable tool not only in helping reducing patients pain and resolving their fungus but in adding revenue to my practice. It provides another tool to your arsenal of treatment that is a very effective in helping my patients. I love how the Remy is so versatile in switching from nail treatment to the fasciitis probe in less than a minute.

Chris Ferguson DPM, New West Podiatry

I just began using the Remy Laser and it's amazing! Training was easy, live, clear and concise. Dr Zuckerman has been available 24/7 via phone/text for support and is a wealth of information. My patients love the therapy itself and are raving about the results. I would definitely recommend adding this lucrative and effective treatment regimen to every practice.

Jay Seidel DPM, Hamilton Foot Care

Specifications

The Remy is a Class IV, 510K FDA-Cleared Laser provided by Zuckerman Future Technologies. It includes both dual and quad wavelength options, which can be customized to fit your treatment protocol.

The Remy has been recently updated to include an Android software interface. This now allows for immediate software updates online.

The interchangeable handpieces can be switched with a simple finger-switch, making treatment from one patient to the next run smoothly and efficiently.

Wavelength: 980 | 810

Peak Power: 30w

Operation Mode:
Continuous Wave (CW)
or Repeat Pulse

Pilot Beam: Red Diode Laser of 650nm

Display: 7" True Color Touch Screen
600 x 1024 resolution

Dimensions: 160 (w) x 180 (l) x 235 (h) mm

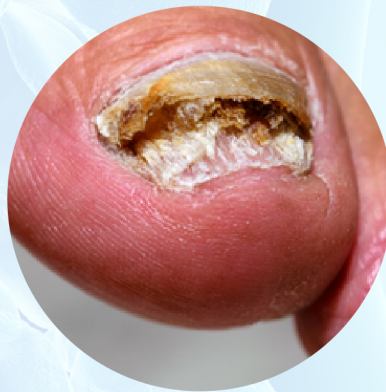

Weight: 4 lbs

Patient Conditions

The Remy is 510K and FDA-cleared to treat a wide range of patient conditions from pain/inflammation and onychomycosis... to surgical treatment of plantar and mosaic warts (*without the use of anesthesia*).

With interchangeable handpieces that can be switched with a simple finger-switch, shifting from therapy to fungus... or fungus to surgery... or back to therapy... is achieved smoothly and efficiently.

- Arthritis & Gout
- Bone Spurs
- Bunions
- Fungal Nail
- Inflammation & Pain Relief
- Plantar Fasciitis
- Post-Surgical Care
- PTTD/Adult-Acquired Flatfoot
- Metatarsalgia
- Neuroma
- Shin Splints
- Sprains & Tears
- Warts (Plantar & Mosaic)
- Wound Healing

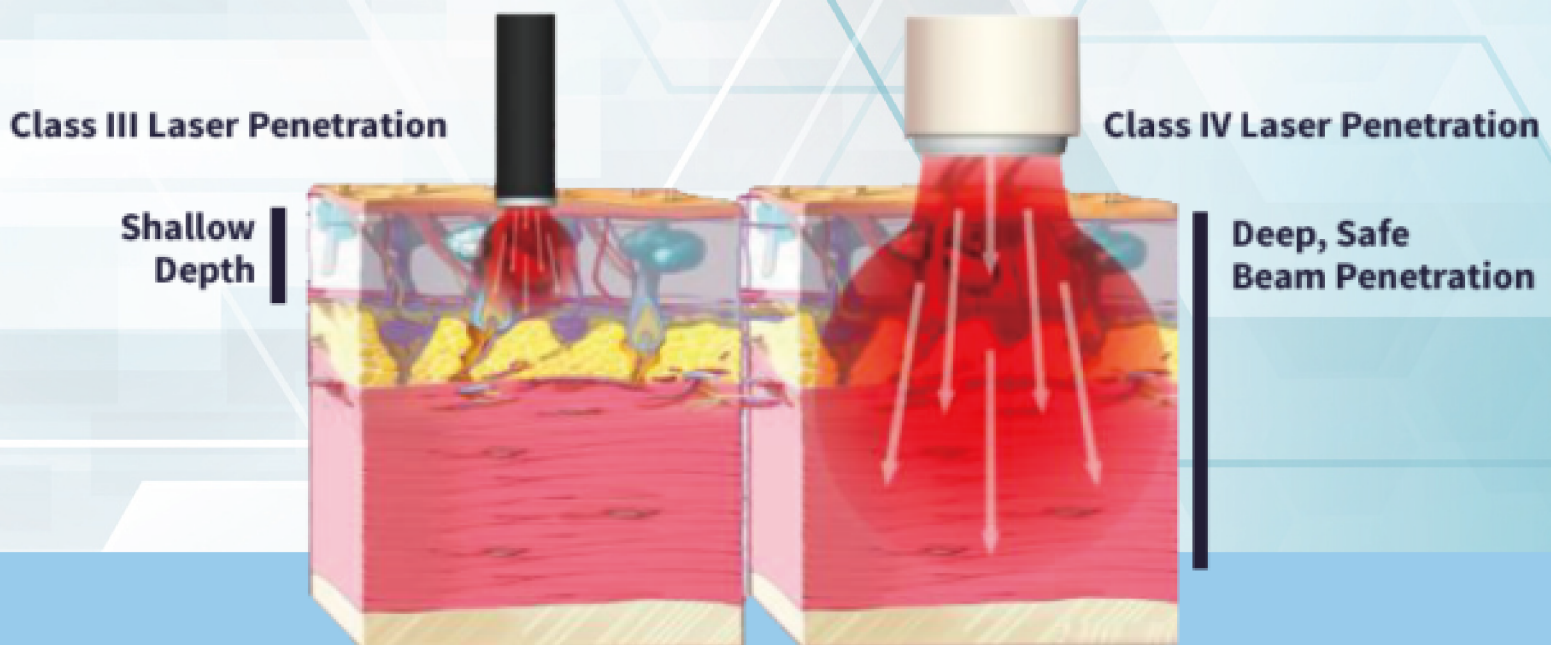

How Class IV Laser Therapy Works

Laser therapy light is infra-red electro-magnetic energy entering the body as photons.

Tissues targeted are stimulated to increase production of a cellular enzyme (Cytochrome C Oxidase) that is critical to the production of ATP.

ATP is the currency of chemical energy in living cells. With increased ATP production and thus greater cellular energy a host of biological responses are facilitated, such as mediation of pain, reduction of inflammation, reduced scar tissue, increased cell metabolism, improved vascular activity, and accelerated healing.

This is the photo-chemical effect of High Power Laser Therapy.

Marketing & Patient Education

Zuckerman Future Technologies will provide a complete marketing tool kit so you can begin making your current and prospective patients aware of your latest technology!

Your integrated tool kit includes:

- Practice Posters
- Brochures
- Advertisement Templates
- Post Card Templates
- Appointment Cards
- Educational Patient Videos
- Website Verbiage
